

FASTEST CUTTING BLADE YOU WILL EVER USE.

10"x.395x.125x1 @ \$167.00
12"x.395x.125x1 @ \$231.00
14"x.395x.125x1 @ \$267.00
16"x.395x.125x1 @ \$324.00

14"x.395x.125x1 @ \$315.00sc
16"x.395x.125x1 @ \$363.00sc
(sc= above are silent core)

(16"x.475x.165x1 @ 396.00
(used to precut ahead of ring
saw)

This blade is any thing but common. Life of this blade is fantastic at all of what it will cut and the life it will give you. Hard fired brick is no match. Hard granite and marble. Cured concrete where the "PRO contractor" wants to cut and get out of the building.. Lintels, pre-stressed concrete, high density products are just a small list. Cutting sandstone you would think would destroy it, but it makes little to no difference. Need a bigger arbor than 1" we can change that with no problem. It really is a blade that will change your attitude about "Life and Speed".
