12" x 250 x 1	365.00	cddem 12
14" x 250 x 1	417.00	cddem 14
16" x 250 x 1	500.00	cddem 16

We use standard core with carbide welded to edge. Need to run one direction and then reverse to keep carbide wearing the same. Will cut thru roofs, tree roots, frozen ground, some rubber roofs, some wood. Great for cleaning out tar in concrete joints. Can be used either wet or dry. Both types are available.

TAR & BACKER ROD CLEAN OUT BLADE

part # FUNNY 14
 14" X 395 X 250 X 1 \$440.00

Used to clean out existing concrete joints that tar was used to seal, or expansion material of any type. This blade is usually used on high horse power saws down to 20hp. High horse power should not be used if you want life. But some people know more than we do?

Laser welded blade so you can run it wet or dry.
