All above blades are laser welded and designed for EARLY entry of green concrete. These blades are designed specifically for this purpose – correct time of entry is critical. Blade clearance problems may require half sizes.

The true cost of your blade is the inch feet the blade cuts vs the cost you pay for it. We feel our blade is one, if not the best, values on the market today. Yes there are cheaper blades, and you get what you pay for. The problem today is our competition makes their blade with 'backer' pads and that means NO diamonds in their 'backer' pad. It takes diamonds to grind thru concrete, the segment will not cut anything.

Either type is available
