*denotes that is blade is to used for pre cutting ahead of a ring saw blade.

When you do not realize what a .100 backer pad is you have to appreciate a company like us to refuse to offer such a rip off. Need help in understanding this? let us know!
Extremely hard material is no problem for this blade, Granite hard hard brick, stone, quartzite are just to name a few of the aggregates that this blade handles with no problem. Fast cutting. Life is even great when used on soft materials. Soft materials do not seem to bother.
