These are premium tile blades. To be used for **porcelain** and or ceramic. We stock one blade rather than several ... which makes ours cheaper in the long run.

However, we can special order cheaper tile blades if needed. When you compare us to other companies, remember that you are getting a "DRY" blade that will cut either wet or dry. Very important because a wet only blade will not produce the life these two blades will and lastly the segment heights we sell are higher than the cheapies.

Granite counter top customers use these also.

**Dry blades can run wet, but wet blades can not run dry!
 You can do it but you will destroy the blade.**
