Cuts cured concrete and cuts fast. Cuts abrasive materials, block, granite, bluestone, limestone, roof tile, abrasive block, even green concrete. Core is built to dissipate heat faster. Excellent blade for the quickie saw that turns too many rpms. Please note 12" thru 20" all have .595 segment height. This is a tremendous high segment. This makes this blade a real value. We market blades that have been engineered to excellence. Not your typical blade supplier that buys anything they can get cheap.,.

All our products go thru a lot of testing before we put them out in the field.
