4"	122.00	4.0rtcb

Barrels are retipped with a 360 thin wall crown
@ .250 segment height. Water ways can be

cut if needed. As you can see we stock many sizes of crowns and 'blank' barrels. We are a manufacturer! Do not compare these retipped core bits with the core bits featured on page SP-10 – the retipped core bits come with approximately 45% MORE diamonds than either items scb5811 or scbws. We or you can cut as many water ways into the crown as you need. All this can be explained to you over a phone call. It is not that complicated or does not take a rocket scientist to understand, or do. Obviously we will not build a core bit for above prices, but you can see we have done this for many years.

Prices are subject to change without notice due to freight and inflation costs.
We reserve the right to ship next higher quality product if we are out of stock.
